Subject: [External] Dominion's long-term resource plan.

I am a Dominion customer and I request that the PSC conduct a public hearing on Dominion's long-term resource plan.

So far, from what I've seen about this plan, Dominion has stuffed the plan with extended close down dates of its operating coal plants, and when they do so, replacing them with natural gas plants. THERE IS NO MENTION OF ANY ATTEMPT TO CONSIDER INCORPORATING CLEAN ENERGY SOLUTIONS INTO THE LONG-TERM PLAN!

As you are well aware, construction of new gas plants will subject us to decades of additional methane releases to our atmosphere as well as construction of new linear impact gas pipelines projects for fuel supply.

I look forward to being able to submit comments to the PSC's attention to help bring Dominion into the world of reality in tackling greenhouse gases with clean energy alternatives.

Thank you for your consideration of this important matter.
